

ABRAHAN CHAURIO

Technical Customer Success · Revenue Operations · Process & Data Bridge

Spain (Remote) | +34 643 06 83 74 | abrahamco@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

6+ years translating between customer, product, and data in telecom and fintech environments. Specialized in technical integrations, financial reconciliation, mediation, and billing processes. Proven experience as the technical-functional reference that business, BI, and product teams turn to in order to solve complex problems, recover lost revenue, and design sustainable processes. My natural role is to be the technical point of contact customers look for when an integration gets complicated, or when there's value to unlock that the product alone cannot deliver. Current focus: Implementation Manager, Technical Account Manager, or Technical Customer Success roles in B2B SaaS, with emphasis on fintech, banking, and digital assets compliance.

PROFESSIONAL EXPERIENCE

Project Manager & Business Operations Analyst - Rockstar Data, Spain - *October 2025 – March 2026*

Coordination of data, ETL/DWH and applied AI projects in a product-led company.

- Cross-functional workflow governance (Data, Backend, Frontend, Product) through definition of acceptance criteria, handoffs, and delivery cadences.
- Design and maintenance of weekly executive cadences for founders and leadership: roadmap status, blockers, priorities, and trade-offs.
- Translation of business needs into actionable functional requirements, aligning scope with real team capacity.
- Workflow governance optimization in ClickUp: increased visibility, accountability, and execution consistency.

System Analyst — Billing Operations & Revenue Assurance - Atos (Telecom Argentina) - *May 2020 – July 2024 (4 years 3 months)*

Mediation and rating backend. Technical-functional reference for Marketing, BI, and Billing teams.

- **Recovered ~\$12M ARS** in lost billing revenue by identifying missing consumption files in Open Mediation, tracing root causes, and coordinating end-to-end reprocessing workflows across operational and reporting teams.
- **Automated recurring tasks** for provisioning and validation using SQL and Shell scripting, achieving an **80% reduction** in manual effort and improving operational consistency.
- Supported revenue-critical billing operations by validating consumption data flows, tariff updates, and migration scenarios to ensure invoicing accuracy and revenue recognition.
- Defined and validated UAT scenarios and acceptance criteria for billing and migration processes across legacy and new platforms, reducing operational risk before production releases.
- Acted as a functional bridge between Billing, Product, BI, and external technical teams (including offshore vendors), translating business needs into technical change requirements.
- Documented and operationalized reusable file formats and process logic (e.g., .GEN consumption files), enabling faster rollout of new services without custom redevelopment.
- Served as SME for a legacy mediation system with no vendor support, maintaining process continuity, environment alignment (DEV/UAT/PROD), and onboarding of new team members.

Integration & Reconciliation Analyst - Increase (Fintech - SaaS) - December 2019 – February 2020
Technical integration support for commercial clients on the payment reconciliation platform.

- Technical guidance to customers through API integration processes between Increase and ERP/merchant systems.
- Technical support to the commercial team in client discovery and integration meetings.
- Reconciliation of large volumes of card transactions (credits, debits, refunds) between Increase's platform and banking APIs, identifying and correcting critical inconsistencies for real-time merchant reporting.

Customer Success Representative - Cat-Technologies (Telecom / BPO) - February 2019 – December 2019
Phone-based customer service and CRM management in outbound telecom service operations.

- Managed CRM systems and handled customer inquiries, ensuring smooth onboarding and issue resolution.
- Assisted with customer onboarding and provided technical and commercial support.
- Promoted services to improve customer engagement and retention.
- Developed key skills in active listening, empathy, and problem-solving.
- Strengthened a customer-first mindset in a high-volume telecom environment.

EDUCATION & CERTIFICATIONS

Bachelor's degree in Business Administration | Universidad de Oriente, Venezuela (2018)
Bachelor's degree in Computer Science (3 years completed) | Universidad de Oriente, Venezuela

Professional Certifications:

- Celonis Process Mining Foundations • Scrum Foundations • PMI Project Management Fundamentals
- SQL • Power BI • Advanced Excel • Continuous learning in Revenue Operations and SaaS adoption processes

KEY COMPETENCIES

Customer Success & Stakeholder Management • Technical onboarding and customer discovery • Requirement gathering and functional translation • Executive cadences (QBRs, business reviews) • Cross-functional stakeholder alignment • User and team training	Revenue Operations & CRM • CRM (Siebel, Open, HubSpot) • ERP & Billing Systems • Revenue recognition and billing workflows • Data quality and financial reconciliation • Process Mapping (BPMN)
Process Design & Quality • UAT and acceptance criteria • Integration testing (APIs) • Data migration validation • Technical-functional documentation • Root cause identification	Technical Tools • Advanced SQL and scripting • Advanced Excel and Power BI • Jira, Confluence, ClickUp • Agile Methodologies (Scrum, Kanban) • Celonis (Process Mining)
